

---

The single most expensive commodity purchased by the AISD is energy. It is our goal, in fact our charge, to consume energy as efficiently as is possible without creating a negative impact on the learning environment. We as a district can only succeed by involving all of the students, faculty, staff, and administration in our energy conservation efforts.

## Seven Habits of Energy Efficient People

- 💡 Turn off the lights every time you leave your classroom or office.
- 💡 Turn off the lights when you leave the faculty breakroom/workroom.
- 💡 Turn off your computer and monitor at the end of the day.
- 💡 Turn off your printer at the end of the day.
- 💡 Unplug media centers or turn off power strips at the end of the day.
- 💡 Turn off student workstations at the end of the day.
- 💡 After you turn off the lights, take a quick look around the room for any little power lights still on (radio, Promethean board, computers/monitors, etc.).
