SCORING GUIDELINES

1. Make sure the parent has answered all questions and has checked the concern column as necessary. If all questions have been answered, go to Step 2. If not all questions have been answered, you should first try to contact the parent to obtain answers or, if necessary, calculate an average score (see pages 40 and 41 of The ASQ:SE User’s Guide).

2. Review any parent comments. If there are no comments, go to Step 3. If a parent has written in a response, see the section titled “Parent Comments” on pages 40–42 of The ASQ:SE User’s Guide to determine if the response indicates a behavior that may be of concern.

3. Using the following point system:
   - Z (for zero) next to the checked box = 0 points
   - V (for Roman numeral V) next to the checked box = 5 points
   - X (for Roman numeral X) next to the checked box = 10 points
   - Checked concern = 5 points

Add together:

Total points on page 3 = ____
Total points on page 4 = ____
Total points on page 5 = ____
Total points on page 6 = ____

Child’s total score = ____

SCORE INTERPRETATION

1. Review questionnaires
   Review the parent’s answers to questions. Give special consideration to any individual questions that score 10 or 15 points and any written or verbal comments that the parent shares. Offer guidance, support, and information to families, and refer if necessary, as indicated by score and referral considerations.

2. Transfer child’s total score
   In the table below, enter the child’s total score (transfer total score from above).

<table>
<thead>

<th>Questionnaire interval</th>
<th>Cutoff score</th>
<th>Child’s ASQ:SE score</th>
</tr>
</thead>
<tbody>
<tr>
<td>48 months/4 years</td>
<td>70</td>
<td></td>
</tr>
</tbody>
</table>

3. Referral criteria
   Compare the child’s total score with the cutoff in the table above. If the child’s score falls above the cutoff and the factors in Step 4 have been considered, refer the child for a mental health evaluation.

4. Referral considerations
   It is always important to look at assessment information in the context of other factors influencing a child’s life. Consider the following variables prior to making referrals for a mental health evaluation. Refer to pages 45–50 in The ASQ:SE User’s Guide for additional guidance related to these factors and for suggestions for follow-up.
   - Setting/time factors
     (e.g., Is the child’s behavior the same at home as at school? Have there been any stressful events in the child’s life recently?)
   - Development factors
     (e.g., Is the child’s behavior related to a developmental stage or a developmental delay?)
   - Health factors
     (e.g., Is the child’s behavior related to health or biological factors?)
   - Family/cultural factors
     (e.g., Is the child’s behavior acceptable given cultural or family context?)
