

Accommodations for Children with Learning Differences (PK-2)

Accommodations are used to support children that learn in different ways. Here is one that might be helpful as you work with your children at home.

Graphic Organizers

What are they?

Graphic organizers are visual learning tools that help children to organize, clarify, or simplify information.

This graphic organizer can be used to describe content using adjectives. It is also great for learning new words. Children can draw pictures or write words in the bubbles.
