

Leaf Art Tutorials

The background is a dark, textured surface decorated with various autumn-themed elements. There are several leaves in shades of green, yellow, and orange scattered around the edges. At the bottom corners, there are sprigs of small, round berries in yellow and orange. Small, glowing yellow and pink dots are also scattered throughout the background.

Leaf Crayon Rubbing

Place your leaf under paper (printing paper works best) with the veins of the leaf facing up. Grab a crayon, lay it flat and rub the crayon over the leaf. If the rubbing doesn't show up, use more pressure, or try a darker crayon. Some leaves have better veins than others.

This is what a completed leaf print will look like.

Use scissors to cut out your leaf crayon rubbing.
